Charlotte Pipe Products Now Available As Smart Revit Drawings

CHARLOTTE, NC – February 23, 2011 – Charlotte Pipe and Foundry Company's extensive line of pipe and fittings are now available as Autodesk® Revit® drawings. The parametric files can be downloaded at www.charlottepipe.com and contain lots of useful data.

In addition to the drawings, users have access to specifications links, technical and installation manuals and a direct link to our website. Users can download individual products or they can choose to download groups of products, depending on their needs.

Until now engineers, contractors, architects and other Revit users relied on general files when designing their 3-D plumbing systems. By using Charlotte Pipe's Revit offering, they can now use plumbing products with exact dimensions, making the virtual system much closer to a real-life installation.

Charlotte Pipe and Foundry is the only manufacturer that offers a system of ABS, PVC, CPVC, cast iron, FlowGuard Gold®, ChemDrain® ReUze® and RePVC® pipe and fittings for residential and commercial plumbing systems and industrial applications. The nation's leading maker of cast iron and plastic pipe and fittings, Charlotte Pipe and Foundry offers the industry's broadest product offering of standard and specialty DWV products.

Charlotte Pipe and Foundry is headquartered in Charlotte, NC, and has seven plant locations across the United States. Combining modern technology with a century of craftsmanship and experience, Charlotte Pipe and Foundry has a proud legacy of commitment to the industry and its customers. The company is guided by the philosophy of its founder - produce the best product possible and provide the best service for the customer.

Revit is an industry standard for Building Information Modeling (BIM) software. It allows users to design construction projects with both parametric 3D modeling and 2D drafting elements. For more information, contact Charlotte Pipe and Foundry at 800-438-6091.
